Director Desk

PZone Electronics Pvt. Ltd., the parent company of Eauguard & Euro Enterprises, was founded in 1997. Since then, with a mission to feel superior quality of Domestic & Commercial RO & its spare parts into the National & International market.

PZone EPL is an ISO 9001-2008, BSCIC NABCB, IMA, NSIC, MSME certified Company approved by Quality Council of India & also member of Water Quality Association. We are also approved by Govt. Of India under the act of TradeMark Act, 1999 with the name of PZone & Classic Aquafresh.

The name "PZONE" has been synonymous with quality & accuracy since its inception in 2006. We are recognized as a world class exporter of RO Water Purifier with state of the art manufacturing, philosophies, continuous process & refined technical support for our esteemed global customers. Our superior production & testing facilities are decisive in enabling us to maintain a steady quality of our products. Our customers are always assured of the quality of our material, production techniques and best performance throughout the process of our manufacturing, starting from section of raw materials to machining to dispatching of finished goods.

REMEMBER

The true measure of a product's worth lies in its
tangible attributes-quality, functionality and customer satisfaction.

**Alkaline Water helps to keep
your cells young & hydrated**

TECHNICAL SPECIFICATIONS

Model	Steel Guard Ro+UV+Zn+Cu+Alkaline
Purification Rate	15-20 Ltr./Hr. (Depends on raw water TDS)
Storage Tank Capacity	07 Ltr. Approx.
Body Material	ABS Food grade plastic
Dimension	40W x 21D x 53H cm.
Input Power Supply	220V AC
Installation	Wall Mounted / Counter Top
Mrp (incl. Gst)	22500.00 INR

JIO

TECHNICAL SPECIFICATIONS

Model	Pzone Jio Ro+Cu+Zn+Alkaline
Purification Rate	15-20 Ltr./Hr. (Depends on raw water TDS)
Storage Tank Capacity	12 Ltr. Approx.
Body Material	ABS Food grade plastic
Dimension	38W x 17D x 51H cm.
Input Power Supply	220V AC
Installation	Wall Mounted / Counter Top
Mrp (incl. Gst)	15500.00 INR

Alkaline Water helps to keep your cells young & hydrated

XCENT GOLD

TECHNICAL SPECIFICATIONS

Model	Pzone Xcent Gold Ro+UV+Cu+Zn+Alkaline
Purification Rate	15-20 Ltr./Hr. (Depends on raw water TDS)
Storage Tank Capacity	12 Ltr. Approx.
Body Material	ABS Food grade plastic
Dimension	38W x 17D x 51H cm.
Input Power Supply	220V AC
Installation	Wall Mounted / Counter Top
Mrp (incl. Gst)	18500.00 INR

Alkaline Water helps to keep your cells young & hydrated

TECHNICAL SPECIFICATIONS

Model	Pzone Novo XL Ro+UV+Zn+Cu+Alkaline
Purification Rate	15-20 Ltr./Hr. (Depends on raw water TDS)
Storage Tank Capacity	12 Ltr. Approx.
Body Material	ABS Food grade plastic
Dimension	38W x 17D x 51H cm.
Input Power Supply	220V AC
Installation	Wall Mounted / Counter Top
Mrp (incl. Gst)	19500.00 INR

ORGANIC

Water Purifier + Ozoniser

TECHNICAL SPECIFICATIONS

Model	Pzone Organic Ro+UV+Zn+Cu+Alkaline
Purification Rate	15-20 Ltr./Hr. (Depends on raw water TDS)
Storage Tank Capacity	10 Ltr. Approx.
Body Material	ABS Food grade plastic
Dimension	39W x 22D x 53H cm.
Input Power Supply	220V AC
Installation	Wall Mounted / Counter Top
Mrp (incl. Gst)	21500.00 INR

Multi Stage of PZONE Novo XL & Xcent Gold RO Water Purifier

FIRST STAGE- Sediment filter 5 micron made of polypropylene spun fiber removes suspended impurities in water like sand, dirt, dust, silt providing first, line protection for the whole system.

SECOND STAGE- Antiscalant- An antiscalant is a pretreatment injection into the feed water before the feed water enters the RO membrane, presence delays the reaction between calcium, Magnesium and Bi-carbonate. The result is scale not forming as the water is being purified by the RO As duration of the water in the membranes system is relatively short during the treatment, scale formation is prevented.

THIRD STAGE- Sediment P.P. cartridge 1 micron. Removes fine dirt, dust much better.

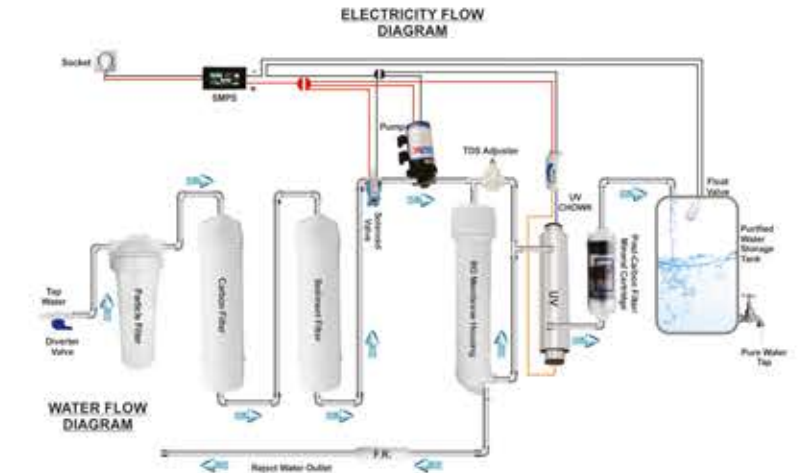

FOURTH STAGE- Magnetic softener- is the study of the effects of magnetic energy on fluids. Michael Faraday discovered that water flowing past a conductive material will generate a weak electrical charges. This discover, that was made over 120 years ago, is the flowing past hydrogen. These three atoms are bonded together by what is called a Covalence Bond. That means that the oxygen atom shares two of it's electron with the Hydrogen Atoms. This structure from what is called a dipole molecule.

How the Technology Works- As water passes through the "PZone's magnetic force field, the minerals crack under mega-rapid bombardment of the minerals in liquid, so that they fracture/abrade into hundred of minute micro-mineral particles, balancing the positive and negativity charges. Thus, "Naturally soft water" that has regained it's "life force/energy" improves the use of ordinary magnets. The magnets are mounted opposite one other organic impurities.

FIFTH STAGE- Granular carbon pre-filter removes Chlorine, Colour and other organic impurities.

SIXTH STAGE- RO membrane eliminates 90-95.5% of all Dissolved impurities harmful substance in water, as well as completely eliminating algae, bacteria and viruses.

SEVENTH STAGE- In-line post carbon filter improves the taste of water + 5 Stage Alkaline.
